

AI flight search that turns **plain language** into booked passengers.

A partner brochure for travel agencies and travel companies — how BizoFlight sends you qualified, ready-to-book flight leads.

AI

NATURAL LANGUAGE SEARCH

Multi

SOURCE AGGREGATION

B2B

PARTNER READY

Travelers describe trips in plain language. Most search engines still make them fill out forms.

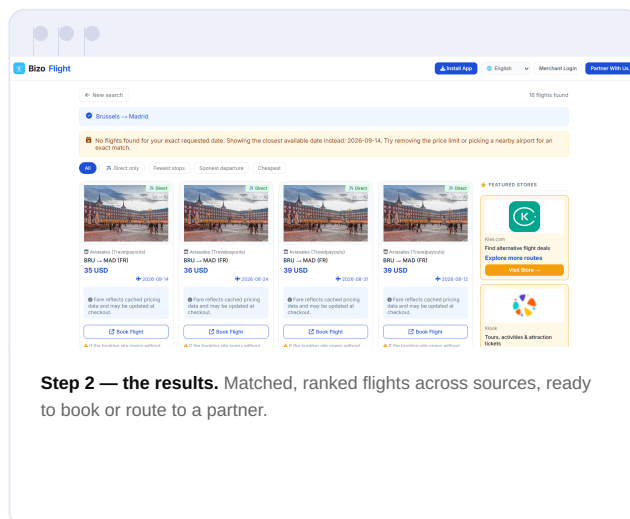

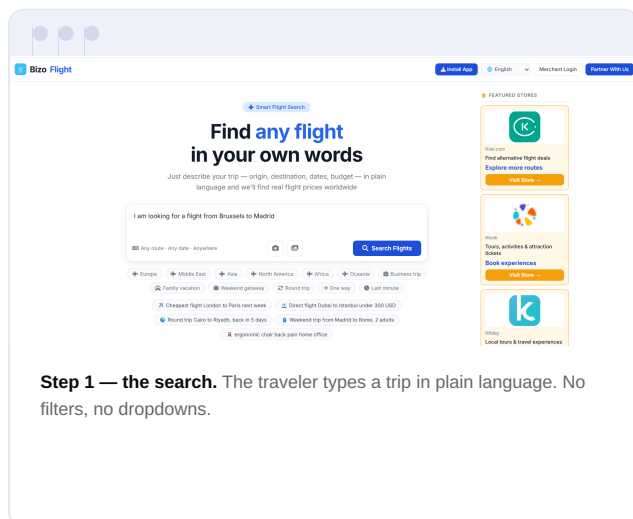

Legacy flight search forces travelers through rigid filters — origin, destination, dates, cabin class, stops — one dropdown at a time. BizoFlight replaces that with a single line of natural language, and returns matched, ranked results in seconds.

THE OLD WAY

- ✗ Multiple filters before a single result appears
- ✗ One source at a time, no real comparison
- ✗ No sense of "cheapest that fits my dates and budget"
- ✗ Travelers abandon the search, or never find you at all

THE BIZOFLIGHT WAY

- ✓ One sentence in, ranked results out
- ✓ Multiple booking sources compared side by side
- ✓ Budget, dates and airline preference understood automatically
- ✓ Every result is a traveler who already knows exactly what they want

Every search on BizoFlight is a traveler who has already decided.

By the time a request reaches a partner, the traveler has already compared prices, picked a route and confirmed their budget. That is a fundamentally warmer lead than a cold inquiry — and it is what BizoFlight sends you.

1

Ready-to-book leads

Full itinerary, price expectation and dates arrive with every request — no discovery call needed to qualify the traveler.

2

No cost to get listed

Joining as a launch partner carries no subscription fee. You only engage when a real, matched request comes in.

3

Reach beyond one GDS

BizoFlight aggregates multiple booking sources, so your agency gains visibility across searches you would otherwise never see.

4

Early-partner advantage

BizoFlight is expanding its partner network now. Early agencies shape which routes and airlines get prioritized for referral.

THE GAP YOU CAN FILL

Some booking sources on BizoFlight — including Duffel-sourced fares — show live, accurate pricing but do not yet support direct in-app booking. Instead of losing that traveler, BizoFlight routes the request to a trusted travel agent partner to complete the sale. **That traveler is the opportunity waiting for your agency today.**

From traveler search to confirmed booking, in five steps.

1

Apply as a verified partner

Register your agency with BizoFlight and confirm the routes, regions or airlines you service best.

2

Get listed on matching searches

Your agency appears as the "Request via Travel Agent" option whenever a traveler's search matches a source you can fulfill.

3

Receive the full request

Route, dates, budget and preferred airline arrive with the lead — everything needed to quote immediately.

4

Contact the traveler and close

Your team follows up directly and completes the booking using your existing systems and relationships.

5

Grow together

As BizoFlight adds direct booking for more sources, established partners are first in line for deeper, automated integration.

REFERRAL PARTNERS

Agencies without an API connection can start immediately through manual lead hand-off — no technical setup required.

INTEGRATED PARTNERS

Agencies with their own booking API or GDS access can discuss a direct integration, enabling in-app booking and commission tracking on BizoFlight itself.

Let's put your agency in front of **travelers** who are ready to book.

BizoFlight is onboarding launch partners now. Reply to this brochure or reach out directly to discuss your routes, your regions, and how leads reach your team.
